MÜHLBAUER GROUP AT A GLANCE

MÜHLBAUER'S BUSINESS UNITS AND SITES

Founded in 1981 in the heart of Bavaria, the Mühlbauer Group has ever since grown to a leading global player in the fields of Parts & Systems, Semiconductor Related Products, Document Solution Related Products and TECURITY® Solutions. With around 3,500 employees, technology centers in Germany, Malaysia, Slovakia, the U.S.A. and Serbia and 35 sales and service locations worldwide, Mühlbauer created a strong competence network around the globe.

We continuously invest in the latest technologies and innovative processes to enhance our competences and provide you with optimized solutions. Our in-house precision part production MPS – Mühlbauer Parts & Systems – guarantees unlimited flexibility and highest customer satisfaction.

Our business unit AUTOMATION does not only develop and assemble individually customized production systems, but also provides matching software solutions for the production process of Document and Solution Related Products. Vision inspection technologies as well as semiconductor and RFID applications complete our comprehensive portfolio.

Our business unit TECURITY® is established as a competent partner for the implementation of security systems for identifying and verifying both documents and individuals. Our clients benefit from more than three decades experiential value which we have gained during the realization of over 300 ID projects worldwide.

TEMA VISION OVERVIEW

STATE-OF-THE-ART INSPECTION SOLUTIONS ALONG THE PRODUCTION LINE

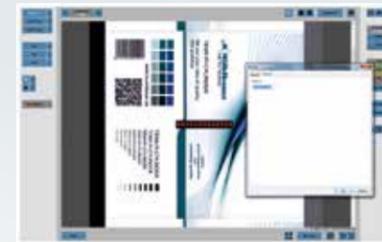

EXPERIENCE & INNOVATION

As a part of the business unit AUTOMATION, TEMA Vision is the brand for one-stop, turnkey inspection solutions based on years of experience and constant innovation.

COMPETENCE – ALL ALONG THE LINE

TEMA Vision system solutions accompany each step of the manufacturing process – from semi-finished materials over finished products to the final decoration.

THE ONE-STOP, TURNKEY PRINCIPLE

TEMA Vision inspection solutions are fully integrated into the production equipment. Planning and consulting are integral parts of the scope of work.

THE CONSISTENT GUI

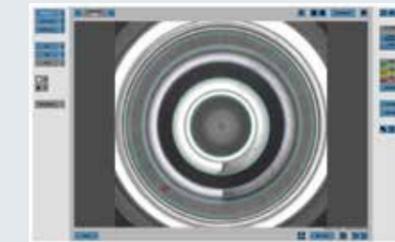

The graphical user interfaces of all TEMA Vision inspection systems are based on the same design. The operator can rapidly get acquainted with different TEMA Vision applications.

INTUITIVE OPERATION

System operation is simple and transparent while always enabling the optimal setup. The operator is supported by wizards, useful defaults and previews.

THE ECONOMIC FACTOR

With cost-efficient, high-performance standard systems and special solutions, TEMA Vision offers the best price-performance-ratio for a zero-defect policy.

THE 3 MAIN BENEFITS

TEMA Vision inspection solutions help to achieve optimal results in terms of product quality, production costs and process optimization.

YOUR LIFETIME PARTNER

Mühlbauer has the potential to be your reliable, long-term partner for planning, realizing and running quality assurance projects – whatever your visions of quality may be.

INDUSTRY 4.0 - NETWORKING

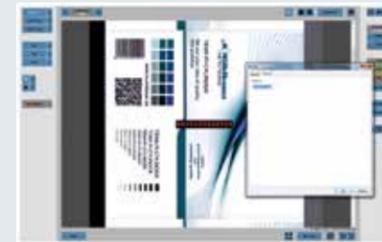

THINKING ON A LARGER SCALE

Looking at the production as a whole, with all its data generated along the line, you can see a complex network of interrelated processes. Our quality inspection concept is a vital part of this network. The industry's focus is moving away from isolated solutions towards broad interacting inspection concepts which support the automation of your plant.

- Monitor your production in real-time and understand coherences through the historical analysis of the logged data.
- Gain comprehensive data to investigate, understand and portray process flows and production results.

SOFTWARE & DATA LOGGING

Features

- Wizard step by step
- Automatic image alignment
- No fonts required - pixel comparison
- Detection of all deviations in the inspection area
- Highlighting of deviations
- Detailed report, input field for comments
- Indication of defects according to defect level (major first, minor last)

Features

- Real-time big data handling
- Network over the whole production line
- Real-time performance monitoring
- Statistics for quick overview of performance figures in relation to time, shift and production line
- Printable report
- Adaptable to any end device

DESIGN MATCHER

The DESIGN MATCHER software tool ensures that the final print result matches the contents of the initial design file. It is used in both the pre-press and printing process.

Comparison

- PDF file against PDF file
- PDF file against TIF file (or comparable)
- PDF file against BMP file (or comparable)

Benefits

- Quick reliable detection of mismatch
- Comparison of artwork with the printed reference
- Directly accessible from print inspection PI-CYLINDER software
- Creation of an evidence document
- Results can be analyzed and archived

MB PALAMAX®

The new web-based, modular data logging and information tool for total process transparency which turns data into information.

Benefits

- Monitoring of performance figures at a glance
- Structuring of data through configurable displays, reports & filters
- Easy integration into existing IT infrastructure
- Future-oriented & flexible solution

TEMA PI-WEB & PI-SHEETS

PRINT INSPECTION SOLUTIONS FOR WEB/SHEET MATERIAL

Mühlbauer's TEMA Vision print inspection systems for web material and sheets are inline solutions integrated into the production line. They can individually be adapted to specific requirements, e.g. different material widths, layouts of print subjects, inspection areas, throughput rates and special conditions of the substrate, e.g. reflective metal or high-glossy foil.

PERFORMANCE DATA

- Width/thickness: depending on application & system configuration
- Speed: average: 1000 meters/min.

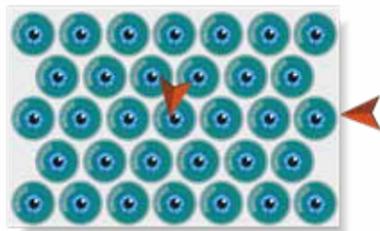

- Wizard-guided setup for one print subject - automatically applied to all other print subjects
- Design Matcher (comparison pdf-pdf, pdf-tif, pdf-bmp)
- Individual parameters for each inspection zone; layer technology
- High-accuracy color inspection of full decoration (automatic color correction)
- Grid-based defect detection
- Input/output as RGB & L*a*b* values
- 1D- & 2D- barcode verification
- Color monitoring - pre-warning for gradual defects
- Layout measurement
- Protocol/statistics - grid-based report function
- Remote service via internet connection
- Determination of sheet size/print position on the sheet/web width (optional)
- Other configurations & features on request

RELATED PRODUCTS

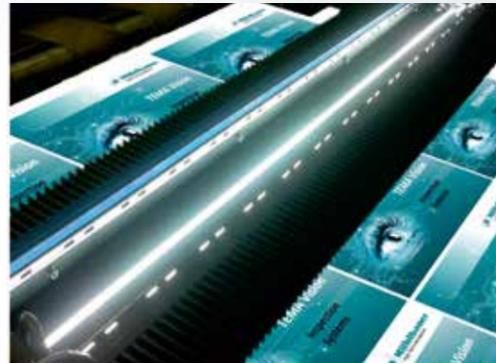

- TEMA CCI (see page 28/29)

TEMA SI-CYLINDER

SURFACE INSPECTION ON UNDECORATED CANS, BOTTLES & TUBES

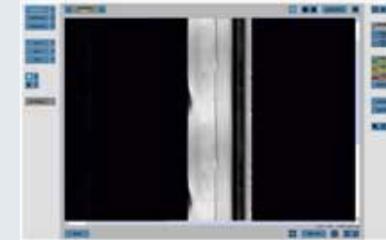

TEMA SI-CYLINDER is Mühlbauer's inline solution for surface inspection on tubes and cans in almost any type of printing, base coating or trimming unit. After the surface scan and quality assessment is completed, the inspection system provides a signal to the PLC which, in case of a detected defect, can be used for initiating a warning signal, a reject or a machine stop, if necessary.

RELATED PRODUCTS

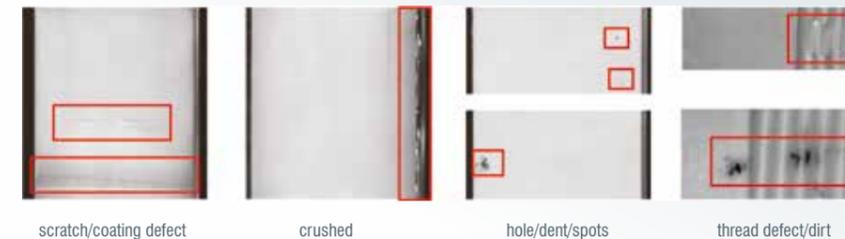

- TEMA PI-CYLINDER (see page 14/15)
- TEMA CTI-NECKER bs. (see page 16/17)
- TEMA CTI-CONVEYOR (see page 18/19)

PERFORMANCE DATA

- Diameter: up to 90mm (more available on request)
- Length: up to 260 mm (more available on request)
- Speed: approx. 350 units/min.

- Easy-to-use graphical interface
- Wizard-guided setup
- Automatic detection of tube length
- Precise full scan of the exterior side wall
- Detection of mechanical & optical defects
- Distinction of mechanical defects against optical defects
- Special version for decorated surfaces available
- Special version for tube tip incl. thread available
- Live images/defect image storing
- Protocol/statistics
- Printable report
- Remote service via internet connection
- Other configurations & features available on request

INSPECTION CRITERIA

- Color variations
- Out of register/offset/double print
- Blurred print
- Stains, blobs & smear
- Voids, missing print, blocked nozzle
- Misprint
- Surface defects (as far as visible)
- Print-to-edge variations (optional)
- Cap defects (optional)
- And similar

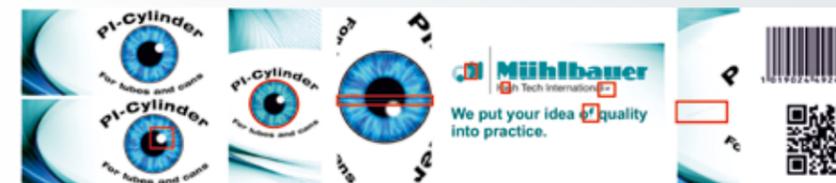

- Inline solution
- Integration in printing or capping machine
- High-resolution prism line scan camera, color
- Super-bright LED line light system with broad spectrum for matt & reflecting surfaces
- Separate control cabinet (climate-controlled)
- UPS (uninterruptible power supply)
- Camera upgrade (4096 pixel/line) (optional)
- Clock-object signal (optional)
- Object tracking & reject (optional)
- Contactless encoder, if required (optional)
- Operator terminal with touch screen (mobile, floor mounted or with swivel arm)
- Keyboard & mouse (optional)

PERFORMANCE DATA

- Diameter: up to 90mm (more available on request)
- Length: up to 260 mm (more available on request)
- Speed: approx. 300 units/min.

- Suitable for various materials & print techniques (incl. digital print)
- Design Matcher (comparison pdf-pdf, pdf-tif, pdf-bmp)
- Wizard-guided setup, previews & useful pre-settings
- Individual parameters for each inspection zone; layer technology
- High-accuracy color inspection of full decoration/automatic color correction
- Field of view infinitely adjustable (from 250 mm to 90 mm)
- Input/output as RGB and L*a*b* values
- 1D- & 2D-barcode verification
- Color monitoring, pre-warning for gradual defects, layout measurement
- Serial defect detection
- Statistic tool for process analysis
- Printable report with all inspection data
- Remote service via internet connection
- Determination of distance print-to-edge (optional)
- Integrated cap check (optional)
- Other configurations & features available on request

TEMA CTI-NECKER bs

TOTAL CURL & SHOULDER/NECK INSPECTION

TEMA CTI-NECKER bs is Mühlbauer's patented system solution for inspecting top, side and backside of the curl together with the can shoulder or bottle neck in one camera and analysis image. The inspection unit is installed inside the necking machine like a tool. Switching between can and bottle inspection is quick and easy. TEMA CTI-NECKER bs communicates with the PLC and gives a defect signal every time a can/bottle has to be ejected.

AREAS OF INTEREST

- Curl
- Shoulder/neck

DESIGN

RELATED PRODUCTS

- TEMA PI-CYLINDER (see page 14/15)
- TEMA CTI-CONVEYOR (see page 18/19)
- CIM-12 (see page 20/21)

PERFORMANCE DATA

- Diameter: up to 66 mm (more available on request)
- Speed: approx. 300 units/min.

- High-accuracy surface inspection of curl, neck & shoulder (extended view)
- Real print inspection
- Suitable for cans & bottles (quick switch via bayonet lock)
- Wizard-guided setup
- Pre-settings for inspection sensitivity
- Individual parameters for each inspection zone
- Optical defect magnification in extended view for increased detection reliability
- Curl measurement & seam detection
- Pre-warning for gradual defects
- Protocol/statistics
- Printable report
- Remote service via internet connection
- Other configurations & features available on request

INSPECTION CRITERIA

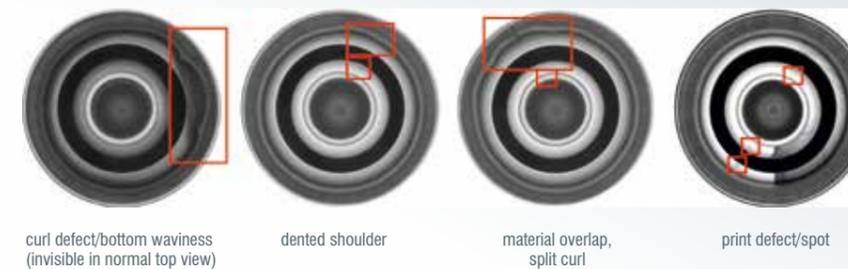

Curl (top, side & backside)

- Cracks, split curl, burrs, dents, deformation
- Material overlap
- Oil/color stains, pollution
- And similar

Neck/Shoulder

- Print defects
- Oil/color stains, pollution
- Dents, deformation & cracks
- Coating defects
- And similar

- Inline solution
- Integration into the necking machine
- Installed like a necking tool (easy mechanical setup)
- High-resolution matrix camera, b/w
- Tool-free camera adjustment (optional)
- Dual LED lighting system (for curl & shoulder)
- Collector for extended view (side & backside of curl)
- Exchange module for bottles
- Self-cleaning unit
- Separate control cabinet (climate-controlled)
- UPS (uninterruptible power supply)
- Operator terminal with touch screen (mobile, floor mounted or with swivel arm)
- Keyboard & mouse (optional)

TEMA PI-CUP

PRINT INSPECTION ON ROUND, CONICAL CUPS INSIDE CUP PRINTERS

TEMA PI-CUP is Mühlbauer's print inspection solution integrated into printers for round, conical cups. This vision system combines high speed and high accuracy in an unparalleled way. The conical shape of the cup has no disturbing influence on the inspection performance. Barcode verification is available. Defects are reported to the PLC and lead to a warning signal, a reject or even a machine stop, if necessary.

PERFORMANCE DATA

- Diameter: up to 180 mm
- Print height: up to 200 mm
- Speed: approx. 600 units/min.

RELATED PRODUCTS

TEMA PI-CUP square

PRINT INSPECTION ON RECTANGULAR CUPS INSIDE CUP PRINTERS

TEMA PI-CUP square is Mühlbauer's inspection solution in printers for square cups. According to the printing process one vision unit inspects the long sides while the second vision unit checks the front and rear side of the cup. The quality of each cup side is determined by comparing the print image against one out of two stored reference images. The defect signal can trigger a warning, a reject of the cup or even a machine stop.

PERFORMANCE DATA

- Length/width: max. 150 mm/120 mm
- Print height: max. 130 mm
- Speed: approx. 400 cups/min.

- Suitable for various materials & print techniques (incl. digital print)
- Design Matcher (comparison pdf-pdf, pdf-tif, pdf-bmp)
- Wizard-guided setup & previews
- Useful pre-settings
- Individual parameters for each inspection zone; layer technology

TEMA ISI-CUP

INTERIOR SURFACE INSPECTION OF PLASTIC CUPS

TEMA ISI-CUP, Mühlbauer's solution for interior surface inspection of rectangular or oval cups, is typically used with a vacuum conveyor to transport the cups (bottom up) to the inspection unit. Side wall and bottom are captured and analyzed in one image. Inspection parameters are exactly adapted to the cup shape and size. A reject signal is given for defective cups. Ejection is separately monitored for 100% reliable results.

PERFORMANCE DATA

- Length: up to 140 mm (filling quantity: 500 gr.)
- Speed: approx. 900 cups/min. (depending on transport)

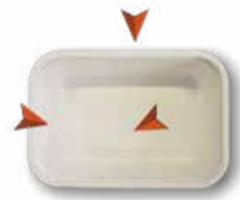

- Wizard-guided setup
- Easy-to-use graphical interface
- Individual parameters for each inspection zone
- High-accuracy defect detection on side wall & bottom
- Detection of shape variations
- Continuous object tracking
- Monitoring of reject process
- Protocol/statistics

- Stains & blobs
- Smear
- Out of register/out of center
- Voids & missing print
- Misprint/double print
- Scratches
- Dimensional defects
- And similar

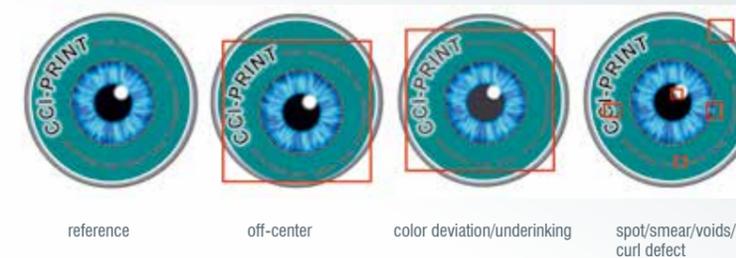

- Inline solution
- Conveyor & reject unit (optional)
- Compact design, height-adjustable
- Single or twin system (multi-lane)
- High-resolution matrix camera, b/w or color
- Super-bright LED lighting unit (different versions available)
- Hardware for clocked & asynchronous processes
- Separate control cabinet, climate-controlled
- UPS (uninterruptible power supply)
- Operator terminal with touch screen (mobile, floor mounted or with swivel arm)
- Keyboard & mouse (optional)

PERFORMANCE DATA

- Diameter: up to 113 mm (other dimensions available on request)
- Speed: up to 1080 units/min.

- Design Matcher (comparison pdf-pdf, pdf-tif, pdf-bmp)
- Continuous object tracking
- Wizard guided setup
- Easy-to-use graphical interface
- Area-specific inspection methods
- Virtual object orientation for reference comparison
- High-accuracy print inspection
- Two objects in one image (e.g. for tampon print)
- Detection of shape variations
- Pre-warning for gradual defects
- Monitoring of the reject process
- Protocol/statistics, defect classification
- Report function
- Remote service via internet connection
- Other configurations & features available on request

TEMA PI-LID

PRINT INSPECTION FOR INTEGRATION IN LID PRINTERS

TEMA PI-LID is Mühlbauer's compact print inspection solution for integration in lid printers. PI-LID uses a line-scan camera and a double line lighting for optimal visualization of the inspection object. The print image is compared to a reference image. Defects are reported to the PLC.

PERFORMANCE DATA

- Diameter: 50 mm - 250 mm (other dimensions available on request)
- Speed: approx. 3.6 m/sec.

- Suitable for various materials & print techniques (incl. digital print)
- Design Matcher (comparison pdf-pdf, pdf-tif, pdf-bmp)
- Wizard-guided setup, previews
- Useful pre-settings
- Individual parameters for each inspection zone: layer technology
- High-accuracy color inspection of full decoration (automatic color correction)
- Input/output as RGB & L*a*b* values
- 1D- & 2D-barcode verification
- Pre-warning for gradual defects
- Serial defect detection
- Statistics tool for process analysis
- Printable report with all inspection data
- Remote service via internet connection
- Other configurations & features available on request

EFFICIENT ADAPTATIONS & ADDITIONS

TEMA SI-PI-CYLINDER

Combine surface & print inspection for your tubes, cans or bottles!

Optimize your inspection performance and eliminate pseudo-rejects: TEMA SI-PI-CYLINDER is a combination of the proven TEMA Vision inspection solutions SI-CYLINDER and PI-CYLINDER. Two vision units are integrated in the printing machine (or base coater and printing machine). This twin system has been designed to perform both surface and print inspection using the best suitable hardware components and software algorithms for each specific task. The two vision units are connected to one control cabinet and can be operated at one user terminal with two separate monitors for optimal usability.

TEMA SI-PI-CYLINDER is the most reliable inspection solution to detect both surface defects (immediately prior to printing) and print defects (immediately after printing). Both inspection units operate within their best range.

PI-CYLINDER & CAP CHECK

Inspect both print & tube cap in your capping machine!

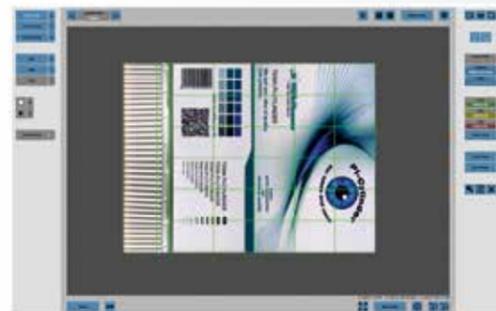

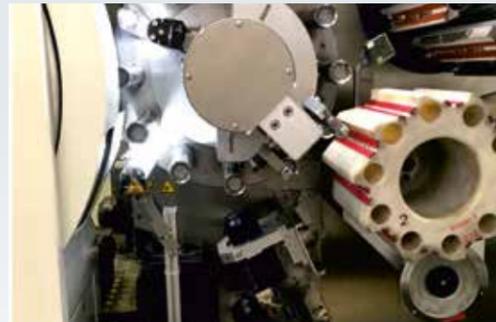

If installed in a capping machine, TEMA PI-CYLINDER can perform both print inspection and a 360 degree quality check of the cap. The software provides a separate inspection area in which individual algorithms and parameters tailored to this specific task are effective.

This is the easiest way to simultaneously check the print and the quality of the cap with only one inspection unit.

INDIVIDUALLY COMPOSED SYSTEM SOLUTIONS

If you have special requirements or ideas you can contact us. Together we will find a solution that suits your individual needs. Examples:

- Inspection of your moulded parts
- Inspection of transparent dome lids
- and many more ...

SECURITY

MÜHLBAUER SECURITY SOLUTIONS

BANKNOTE INSPECTION

Inspection of substrate, print & security features

SHEET INSPECT is Mühlbauer's high-precision inspection solution for sheets, designed to verify the quality of substrate, visible print, UV/IR print and security features. It perfectly combines Mühlbauer's machine expertise with the wide competence in inspection technology by TEMA Vision.

COIN INSPECTION

Quality inspection for blanks, minted coins & used coins

COIN INSPECT is Mühlbauer's flexible and configurable inspection machine for high-speed, double-sided inspection and measurement of blanks, minted coins and used coins. It is suitable for a great variety of alloys and shapes like disk, ring, polygon, bi-metal and colored coins. It provides special features for coin fitness check and counterfeit detection.
